Education

Bachelor of Science: CIS - Computer Science

Expected in 05/2027

Nicholls State University - Thibodaux, LA

Professional Summary

Computer Information Systems major with Computer Science concentration, experience in JavaScript, React, and HTML/CSS and hands-on work managing large data sets (36 000+ records) for the university library. Currently building my Python skills and seeking a data engineering, software engineering or IT internship to help build projects while gaining real world experience.

Skills

HTML5 | CSS | JavaScript | React | Python - (in progress) | Backend and frontend integration | Basic SQL | Troubleshooting | Basic hardware and device configuration | Printer and scanner support | Git & GitHub | VS Code | Chrome DevTools | Google Workspace | Microsoft Office

Work History

Library Student Assistant — Serials Department | Nicholls State University Library – 08/2025 to Current

- Managed and organized spreadsheet datasets of over 36,000 library books, enhancing data integrity and supporting smooth software migration.
- Implemented Library of Congress classification to enhance user access to library resources.

Summer Student Intermediate Employee | Nicholls State University Housing – 05/2025 to 08/2025

- Managed housing spreadsheet data sets for occupancy, move-ins, and key returns, maintaining accurate housing services data management.

Projects & Experience

- Built **TaskFlow**, a React-based task manager app with Supabase for authentication and data storage, supporting real-time task creation and updates.
- Built and deployed a personal **portfolio website** using React and JavaScript to showcase projects with a clean, responsive UI.

Certificates

Earned Meta Front-End Developer Certificate by mastering HTML, CSS, JavaScript, React, and modern workflows through Coursera.
